PROFESSIONAL SUMMARY

UX Design intern at RevvityAI with experience across enterprise AI products specializing in B2B SaaS and enterprise software, with experience designing complex workflows across fintech, automotive, and legal technology. Skilled in user research, information architecture, user flows, wireframing, prototyping, interaction design, and usability testing. Experienced in translating complex business processes into intuitive desktop and responsive digital experiences, with a focus on workflow efficiency, scalability, and usability. Experienced in leveraging AI tools to accelerate research, ideation, and design decision-making.

EXPERIENCE

UX intern – RevvityAI *Jul 2026 – Present*

- **Document Studio**
  - Clinical R&D teams manually created templatized documents increasing turnaround time and limiting capacity for content review
  - Discovered and defined the product scope of an AI platform that generates Clinical Document adhering to correct template as per Government standards.
  - Measured a 80% decrease in time taken in manual document creation and editing documents Now documents can be generated and edited with a single prompt!
- **Legal matter management and Litigation portal**
  - Two sister projects with overall similar design as, Legal matter management is a CRUD application while Litigation portal in a notification hub to Legal and IT teams to work together synchronously. An estimated cost avoidance of $35-40K annually

UX designer (contract) – Home Mechanic *Jun 2025-Jul 2025*

- Designed an internal CRM platform to streamline workflows for Business Development Associates, reducing manual tracking effort by 40%
- Created user flows, wireframes, and interactive prototypes, ensuring feasibility for frontend implementation

User Experience Intern – Them Consulting *Jul 2024 – Apr 2025*

- Designed end-to-end UX for ICICI Corporate Internet Banking (CIB), including Fixed Deposit booking, approval workflows, and Overdraft-against-FD cross-selling.
- Translated complex banking requirements into scalable user journeys, wireframes, and high-fidelity designs, contributing to ICICI's design system and responsive mobile experiences.
